

RICKY RICHARD TAKAHINDANGEN

Jl Moiveland, Cikarang Utara, Jawa Barat | takahindangenricky@gmail.com | +6282343651205 | github.com/rickyrichard26

PROFILE

Informatics student at President University specializing in Cyber Security with strong focus on system security, vulnerability assessment, and ethical hacking. Experienced in using security tools and analyzing potential vulnerabilities in web applications. Highly motivated to strengthen cybersecurity skills and contribute to protecting digital systems and infrastructure.

EDUCATION

Bachelor of Informatics - Cyber Security Concentration 2024 - Present

President University, Cikarang | Current GPA: 3.70/4.00

- Relevant coursework in Ethical Hacking, Digital Forensic, Security Risk Management Audit, Cryptography Data Security and Cyber Security Fundamentals

EXPERIENCES

SYNTECXHUB - Mobile Developer Intern (Remote) April 2026 - May 2026

- Responsible for developing an Android digital clock application that displays real-time time, supports 12/24-hour format switching, includes optional alarm/countdown features, and maintains proper functionality during app lifecycle events.

AI Workshop - Google Singapore Jun 2025 - July 2025

- Participated in a hands-on workshop focused on building & deploying AI agent system.
- Gained practical experience implementing intelligent automation workflows.

Treasurer - Social Project President University Jun 2025 - July 2025

- Managed event budgeting and made a financial report

Member of Division Hackathon - Compsphere 2025 President University May 2025 - Oct 2025

- Assisted in preparing event schedules and technical requirements to ensure smooth competition flow.
- Supported participants by addressing technical and operational issues, enhancing their event experience.

PROJECTS

Crypto Web Application Firewall (Crypto-WAF)

- Designed a security system to ensure confidentiality, integrity, and authenticity of data
- Applied cryptographic authentication and secure key management
- Implemented defense against SQL Injection, XSS, and brute-force attacks

Web ISO-Shield - Security Audit & Risk Management

- Built a full-stack web platform for ISO/IEC 27001 security auditing and compliance management.
- Tech stack: Next.js 14, Supabase, Tailwind CSS with an AI-assisted audit consultation feature.

BPOMate-AI – AI-Powered Regulatory Recommendation System

- Developed using React (Vite) frontend, Express.js backend, and PostgreSQL database.
- Implemented a Regulatory Database module to manage and track BPOM compliance parameters across product categories

Web Security Audit - DVWA

- Performed vulnerability assessment on DVWA
- Documented security findings with supporting evidence
- Identified common vulnerabilities (SQLi, XSS, CSRF)

Digital Forensic Investigation - Miami PD Case

- Analyzed digital evidence related to the Miami PD case scenario.
- Applied forensic methodologies to identify relevant artifacts and reconstruct potential incident activities.

SKILLS

Technical Skills: JavaScript, PHP, C++, HTML, CSS, Node.js, Next.js, Vulnerability Assessment, Security risk analysis, MySQL, FTK Imager, Autopsy, NetworkMiner, Wireshark, Python (Basic)

Soft Skills: Communication, Problem Solving, Teamwork, Leadership, Public Speaking

ADDITIONAL INFORMATION

- Languages:** English, Bahasa Indonesia
- Certifications:** Nestlé E-learning 2026 | Resilience, Delegates of Learn & Lead 5.0, Leaders ID
- Awards/Activities:** PUBS BroadTalk Project Lead (2025), PUBS - Social Media Specialist (2024-2025), Company Visit 2025 - Public Relations PIC
